CORDAGE GROUP

Break-Away Release Link is a patented system that solves the problem of marine mammal entanglements in commercial fishing gear.

PCT/CA2022/050329

The Break-Away system is designed and tested to become the weakest link in a trap buoy setup. During normal use, the rope will connect traps with buoys and gear even in the roughest of conditions. If entangled with a marine mammal, the weak link gives way to safely free the mammal.

- Can be used with existing commercial gear, and creates no additional work or extra training for crews.
- Once installed, the Break-Away system is ready. Should a marine mammal entanglement occur, the rope will simply break away.
- Ideal for any commercial fishing operation where the possibility of marine mammal entanglement exists.

SPECIFICATIONS	
Size	7/16" (11.1 mm)
Colour	Red
Length	1 fathom (1.8 m)
Stitch Tensile Strength	1,635 lbs (average)
Rope Tensile Strength	4,600 lbs
Eye Loop Size	25.4 mm (1")
Construction	Kernmantle
Materials	High tenacity polyester, multifilament polypropylene, 2% UV stabilized, bonded marine grade thread, 3-1 polyolefine heat shrink
